

Index

- AAPOR (American Association of Public Opinion Research), survey studies, 850
- abbreviations
- academic degrees, 442-446
 - addresses, 449-450
 - address format, 449-456
 - agency names, 458-472
 - amino acids, 604-605
 - amino acids sequence variations, 607
 - article titles and subtitles, 12
 - Bethesda System for Reporting Cervical Cytology, 549-551
 - biological nomenclature, 741, 743-744
 - book edition numbers, 55
 - business firms, 458
 - chemical compounds, 526-527
 - chemokine terminology, 677-679
 - chromosome terminology, 640-644, 654-655
 - clinical and technical terms, 501-519
 - clot degradation terminology, 675
 - clotting factor terminology, 670-672
 - collaborative groups, 472
 - cross-references, 432
 - cytokine terminology, 684-685, 687
 - days of the week, months, eras, 448-449
 - definition, 441
 - DNA, 586-587
 - drug names, 574
 - echocardiographic terminology, 559-561
 - elements, 526-527
 - elements in isotope terminology, 707-710
 - endothelial factors terminology, 668-669
 - enzymes, 602-603
 - figures, 119
 - gene symbols, 609-632
 - genus, 743-744
 - gravity, 926
 - group authorship, 472
 - guidelines for, 442
 - headings, 26
 - hemostasis, 667-668
 - indexing, 429-430, 501
 - inhibition of coagulation terminology, 674
 - institutes, 458-472
 - interleukin terminology, 686-687
 - ISO (International Organization for Standardization), 456
 - isotopes, 527-528
 - journal individual word, 479-500
 - journal names, 48, 472-479
 - legal material citation format, 76-77
 - mathematical composition, 908
 - MEDLINE, 479-500
 - military services and ranks, 446-448
 - molecular neuroscience terminology, 730-733
 - molecular terms, 713-720
 - mouse strains, 656
 - names of persons, 456-458
 - No. (number), 829
 - nonhuman histocompatibility terminology, 694
 - nucleotide sequence variations, 593
 - ophthalmology terminology, 736-738
 - organization names, 454-455, 458-472
 - parentheses, 357
 - pluralization, 369
 - professional societies, 458-472
 - publisher reference citation format, 56
 - pulmonary and respiratory terminology, 771-774
 - punctuation, 334-335, 456-457
 - radioactive isotopes, 527-528
 - references, 41
 - RNA terminology, 598
 - running foot, 19
 - Salmonella* nomenclature, 751-752
 - in situ hybridization, 646-647
 - SI units, 790, 792
 - social titles, 456-458
 - spongiform encephalopathies terminology, 768-769
 - state and province names, 451-454
 - statistical, 900-902
 - tables, 92-96
 - time, 796
 - titles of persons, 446-448
 - units of measure, 519-525
 - usage rules, 501-502
 - vertebrae terminology, 723-724
 - viral terminology, 756, 758-759
- abnormal vs normal, negative, positive, usage, 381-382
- abort vs terminate, usage, 382
- Abridged Index Medicus*, 473
- abscissa, statistical definition, 853

- absolute risk, statistical definition, 853
- absolute risk reduction, statistical definition, 853
- abstracts
 - acknowledgments, 146
 - fair use, 199
 - indexing, 435-436
 - manuscript preparation, 11, 20-24, 836
 - online-only articles, 37
 - reference citation format, 49-50
 - scientific presentations, 292-293
 - structured, 4, 20-23, 325
 - tables totals and percentages, 89-90
 - unstructured, 23-24
- academic degrees, capitalization, 378
- accent marks in non-English words, 422-423
- acceptance date, 27
- acceptance of manuscript, 27-28
- access to data statement
 - acknowledgments, 183
 - disclosure, 173-174
 - International Committee of Medical Journal Editors, 142, 144-145, 183
 - peer reviewers, 183
- accident vs injury, usage, 382-383
- accuracy, statistical definition, 853
- acknowledgments
 - access to data statement, 142, 144-145, 182-183
 - additional contributions, 35-36
 - author contributions, 142-144
 - authorship, 14
 - authorship criteria, 130, 132
 - citation format, 36
 - conflict of interest, 170-173
 - contributions recognized, 140-141
 - degrees, 35
 - disclaimer, 33-34
 - editing assistance for manuscripts, 132
 - editorial assessment, 35
 - editorial assistance, 141
 - equipment in research, 584
 - financial disclosure, 30-31, 142
 - funding or grant support, 31, 140-141, 145-146, 173
 - group authorship, 30, 136, 141-142
 - institutional affiliation, 35-36
 - manuscript preparation, 27-36
 - nonspecific groups, 141
 - online journals, 35, 37
 - online sponsorship, 287
 - order of elements, 143-144, 146
 - patient and subject anonymity, 230
 - permission of those acknowledged, 146
 - previous presentations, 34
 - references in manuscripts, 837
 - reproduction of tables and figures, 34-35
 - reviewer credits, 222
 - sponsorship, 32, 145-146, 173
 - statistical analysis, 32-33, 35
 - table derivation, 95
 - written communications, 146
- acronyms
 - capitalization, 379-380
 - definition, 441
 - manuscript preparation, 10
 - tables, 96
- actuarial life-table method. *See* Cutler-Ederer method; life table
- acute vs chronic, usage, 383
- adapt vs adopt, usage, 383
- addenda, original article, 27
- addresses, 12-13, 28-29, 449-456
- adherence vs compliance, usage, 384
- adjectives, 322, 363
- adjustment, statistical definition, 853
- adopt vs adapt, usage, 383
- adverbs, 322-323
- adverse drug reactions, 566-567, 569
- adverse effect vs side effect, adverse event, adverse reaction, usage, 384
- advertising
 - advertising-to-editorial page ratio, 281
 - advertorials, 282-283
 - content, 278-280, 282
 - criteria for in health care, 278-280
 - editorial responsibilities, 276
 - e-prints, 287-288
 - reprints, 287-288
 - scheduling, 282
 - separation from editorial content, 310
 - sponsored supplements, 283-284
 - Web sites, 285
- advertorials, 282-283
- affect vs effect, usage, 384
- affiliation footnotes
 - conflict of interest, 172
 - format, 17-19
 - group authorship, 137
 - punctuation, 340
 - title page of manuscript, 28
- African American, usage, 415-416
- age, inclusive language, 416
- age, referents, 410
- agency names, abbreviations, 458-472
- age vs aged, school-age, school-aged, teenage, teenaged, usage, 384-385
- aggravate vs irritate, usage, 385
- aggregate data, statistical definition, 853
- agreement, statistical definition, 853
- airplane names, 372, 925
- algorithm, statistical definition, 853
- algorithms, visual illustrations, 107, 110
- alleles
 - bacterial gene terminology, 658
 - blood group terminology, 541
 - HLA terminology, 690-694

- immunoglobulin terminology, 700-701
- mouse gene terminology, 650-652, 654
- symbols, 628-632
- T-cell receptor gene terminology, 704
- yeast gene terminology, 657
- allelic variant, nomenclature, 594
- α (alpha), statistical definition, 854
- alphabetizing, 92, 425-429, 432
- ALPSP (Association of Learned and Professional Scholarly Publishers), 185, 193, 974
- although vs though, usage, 385
- American Association of Public Opinion Research (AAPOR), 850
- American Clinical Neurophysiology Society, 724
- American Medical Writers Association (AMWA), 141, 973
- American Society of Magazine Editors
 - advertising policies, 276
 - advertorials, 282-283
 - sponsored supplements, 283
- amino acid terminology, 604-607
- among vs between, usage, 385
- analog and analogue, usage, 385
- analysis, statistical definition, 854
- analysis of covariance (ANCOVA), statistical definition, 854
- analysis of residuals. *See* linear regression
- analysis of variance (ANOVA), statistical definition, 854-855
- anatomy, terminology, 410
- ANCOVA (analysis of covariance), statistical definition, 854
- anonymity
 - acknowledgments, 141
 - authorship, 132-133
 - peer review, 221-222
 - photographs, 121
- anonymous authorship, 189
- ANOVA (analysis of variance), statistical definition, 854-855
- Ansari-Bradley dispersion test, statistical definition, 855
- Anthony Nolan Research Institute, 688
- antibodies, 538, 694-696 (*see also* monoclonal antibodies)
- Anticybersquatting Consumer Protection Act, 214
- antigens, nomenclature, 538-539
- Apgar score, 735-736
- apologetic quotation marks, 360
- apostrophe
 - compound terms, 362
 - eponyms, 778
 - joint possession, 362-363
 - plural formations, 363
 - possessive, 362
 - prime sign, 363
 - time and money, 363
- appendixes to articles, 36
- appositives, punctuation with comma, 337
- apt vs liable, likely, usage, 385-386
- area, dual reporting conventional and SI units, 794
- area under the curve (AUC), statistical definition, 855
- articles (a, an, the)
 - eponyms, 779
 - reference titles, 44, 46
 - usage, 412
- article titles
 - abbreviations, 12
 - capitalization, 12
 - city, state, and country names, 12-13
 - drug names, 11
 - genus and species names, 11-12
 - numbers, 11
 - reference citation format, 46
 - short title, 20
 - title page of manuscript, 8-13
- article types, 3-5
- article vs manuscript, paper, typescript, usage, 386
- artifact, statistical definition, 855
- assessment, statistical definition, 855
- assignment, statistical definition, 855
- assignment of copyright, 193-196
- association, statistical definition, 855-856
- Association of Learned and Professional Scholarly Publishers (ALPSP), 185, 193, 974
- association vs relationship, usage, 386
- assure vs ensure, insure, usage, 386-387
- as vs because, since, usage, 386
- attenuate vs attenuation, usage, 387
- attributable risk, statistical definition, 856
- attributable risk percentage, statistical definition, 856
- attributable risk reduction, statistical definition, 856
- AUC (area under the curve), statistical definition, 855
- audiotapes, reference citation format, 62
- audit of editorial process, 272-274
- author information, 16-19
- author pays, definition, 184-185
- authorship
 - acknowledgments, 129, 132
 - anonymous authorship, 132-133
 - author contributions, 29-30, 142-144
 - changes in, 134-135
 - conflict of interest, 129-130
 - conflict of interest disclosure, 170-173
 - contributor, 128
 - copyright, 191-193
 - corresponding author, 129
 - criteria, 128-130
 - death/incapacitation of author, 131

- authorship (*continued*)
 definition, 127-128
 funding or grant support, 31
 ghost authors, 131-132
 group and collaborative, 14, 51, 135-137, 472
 guest authorship, 131
 number of authors, 133-134
 online-only articles, 37
 order of, 134
 pseudonymous authorship, 132-133
 scientific misconduct, 166
 title page of manuscript, 13
 authors' names, reference citation format, 44-45, 54
 average, statistical definition, 856
 awards, capitalization, 372, 376
 axis labels in figures, capitalization, 119
 axis terms in electrocardiography, 556
- back-formations of words, 407-408
 bacterial nomenclature
 gene terminology, 658
 principles of, 531-532
 strains, 752
 terminology, 748-753
 bar graphs, 101-104, 114
 base moieties in drug names, 570-572
 base units in SI, 788
 Bayesian analysis, statistical definition, 856
 B-cell terminology, 701
 because of vs caused by, due to, owing to, usage, 387
 because vs as, since, usage, 386
 Belmont Report, 227-228
 Berne Convention, 188, 207-208
 β (beta) level, statistical definition, 856-857
 Bethesda System for Reporting Cervical Cytology, 549-551
 between vs among, usage, 385
 bias
 conflict of interest, 171
 industry-sponsored studies, 173-174
 meta-analysis, 848
 peer reviewers, 174-175
 selection in case-control study, 846-847
 selection in case series, 847
 in study design, 838
 bias, statistical definition, 857
 biblical material, in references, 62, 343
 bibliographic databases
 duplicate submission, 151-152
 group authorship identification, 136-138
 libelous material, 241
 retractions, 161-162
 bibliographic elements in references, 41
 bimodal distribution, statistical definition, 857
 binary variable, statistical definition, 857
 binomial distribution, statistical definition, 857
 binomial species names, 742-744
 binomial style for virus species, 759
 BioCode, 741
 biological plausibility, statistical definition, 857
 biopsy, usage, 387-388
 bivariate/bivariable analysis, statistical definition, 857
 Bland-Altman plot, statistical definition, 857
 blinded (masked) assignment, statistical definition, 858
 blinded peer review, 220-221, 264-265, 306-307
 blinding vs masking, usage, 388, 738
 block quotations, 361-362
 block randomization, statistical definition, 858
 blood gas terminology, 771-774
 blood group terminology, 536-542, 615-616
 blotting terminology, 601
 B-lymphocyte terminology, 701
 boldface type
 indexing, 431
 table stubs, 87
 totals in tables, 89
 usage, 924-925
 Bonferroni adjustment, statistical definition, 858
 book reviews
 authorship criteria, 129
 conflict of interest disclosure, 171
 format, 5
 libel, 239
 reference format, 51
 books
 chapter title reference citation, 53-54
 online books, references, 42
 page number citation format, 56
 print references, 42
 punctuation in references, 56
 reference citation format, 46, 67-68
 titles in italics, 925
 bootstrap analysis, 849
 bootstrap method, statistical definition, 858
 box and whisker plot, 106, 114
 boxes, 123
 brackets
 case change in quotations, 359
 ellipses and capitalization change, 365
 formulas, 358, 910
 mathematical composition, 908-909
 within parentheses, 358
 quotations, 357-358
 breastfeed vs nurse, usage, 388
 brief reports, 3
 British Approved Names (BAN), 565
 Brown-Mood procedure, statistical definition, 859
 business firms, abbreviations, 458
 bylines
 acknowledgments, 146
 author affiliations, 18-19
 corresponding author, 28-29

- death of an author, 17
- disclaimer, 33-34
